Asian Society for Quality in Health Care (ASQua)
Application of Lean Management in Health Care
Online Training module

Dear Healthcare Professionals and Enthusiasts,

We are delighted to invite you to a thought-provoking event on the "Application of Lean Management in Healthcare."

The healthcare sector is under constant pressure to enhance efficiency, reduce waste, and provide high-quality care to patients.

Lean Management, a time-tested methodology originally pioneered in manufacturing, has gained significant traction in healthcare settings for its ability to streamline processes, optimize resource utilization, and drive continuous improvement.

Key Objectives of the training module

- 1. Discuss the Fundamentals of Lean Management*
- 2. Learn how Lean principles address unique challenges faced by healthcare organizations*
- 3. Highlight real-life case studies of healthcare facilities implementing Lean methodologies.*
- 4. Explore Lean tools and techniques- Value Stream Mapping, Kaizen, and 5S*
- 5. Application of lean tools in healthcare scenarios.*
- 6. Learn from success stories of Lean projects*

Target audience

- Healthcare Administrators and Leaders*
- Physicians, Nurses, and Medical Staff*
- Quality Improvement Professionals*
- Hospital and Clinic Managers*
- Healthcare Consultants*
- Healthcare Students and Enthusiasts*

Management, Monash Business School,
Monash University, Australia*

Asian Society for Quality in Health Care (ASQua) Application of Lean Management in Health Care Online Training module

Program:

- This will be an **Online Training Module** lasting a total of **4 Hours**.
- It will be delivered in a hybrid mode consisting of recorded expert presentations and real-time group activities.

Workshop Agenda:

- Introduction to the Training Module
- Lean concepts -History & Overview (Recorded)
- Types of Hospital Wastes (Recorded)
- Challenges in Implementing Lean (Recorded)
- Solution Development – A Step-by-Step Approach (Recorded)
- Group Activity – Starting an Improvement Initiative (Live Session)
- Discussion on Pilot Project Proposals (Live Sessions)
- Discussion/Feedback and Q&A Session

POST WORKSHOP:

On completion of this workshop, participants will be able to start a pilot project applying Lean methods to achieve process improvements and eliminate waste in the system.

We propose to establish a competition where pilot projects completed by participants of the workshop can be submitted for assessment, with prizes awarded to the best projects. Further details will be provided during the workshop.
